Dear Joshua:

The projections on the paper I am enclosing, to do with the needs of ERIM are vast and certainly impressive.

I have been working with ERIM toward goals having to do with Holography.

Their funding needs appear realistic; they seem somewhat hampered by their former work for defense.

If this is of interest to you, they would very much appreciate a chance to talk to you, as they are willing to cooperate on a joint exploration, and consider your evaluation important to them.

I will be glad to cooperate, in this matter, in any way that makes sense and can move this forward to the research stage.

Thank you for your time, and please call at your convenience.

Very sincerely yours,

MARIAN B. JAVITS
